SERIOUS MENTAL ILLNESS (SMI)

WHAT

WHY does it matter?

WHERE can you turn?

Bipolar Disorder

Major Depressive Disorder

Schizophrenia

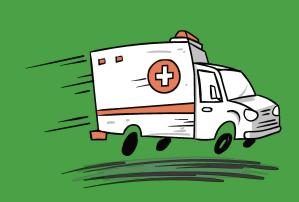

SMI is common

• 1 in 25 adults has SMI in a given year; that equals 4.2% of the U.S. population age 18 or older, or 10.4 million adults1

Individuals who have SMI face a number of concerns

- An estimated 40% of adults with schizophrenia and 51% with severe bipolar disorder receive no treatment in any one-year period.2
- Only 36% have full-time employment¹
- Suicide rates are 20-25% higher than the general population3,4
- 10 million+ visits to emergency departments annually5

Our Mission

Advance the use of an evidence-based, person-centered approach to care

SMI Adviser is a FREE resource for EVERYONE

Mental Health Professionals

- Consultations from SMI Experts.
- CME/CNE/CE-Certified Education*
- Knowledge and Answers.

Individuals Receiving Care

Family Members

Information and answers about SMI, treatments, recovery, and more

Anyone who has questions about SMI

Join our #MissionForBetter at SMIadviser.org/better

Better clinical support. Better resources for families. Better care for people who have SMI.
